

Says

Translation needs to be on real time

It must work on my laptop's camera

Translated language must be readily readable

Translation must be correctly done for the given motion

Need to translate in regional languages also

Application must be easy to use

Thinks

Will it work without internet connectivity?

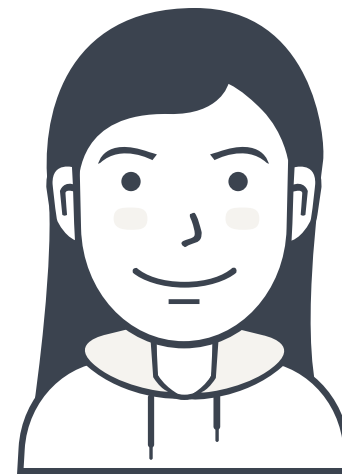

Is a powerful machine required for the application to work?

Will the translation will work correctly?

Should I need to learn documents to use the application?

What happens in case the application crashes?

Should I use this application?

User

Does

Checks internet connectivity

Searches internet for usage

Tests for known sign languages

Contact customer support

Runs on the local machine

Observes how the application works

Feels

Satisfies with the translations provided by the application

Feels excited on the working of the application

Overwhelmed to see the translations provided

Delighted to experience the technology

Seems confused with how the application actually works

Enthusiastic to use the application
