Project Name	Real-Time Communication System Powered by AI for Specially Abled
Maximum Marks	2 Marks

#### Problem Statement:

In our society, we have people with disabilities. Technology is developing day by day but no significant developments are undertaken for the betterment of these people. Communication between a deaf mute and a normal person has always been a challenging task. It is very difficult for mute people to convey their message to normal people. Since normal people are not trained in hand sign language. In emergency times conveying their message is very difficult.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Specially abled people	communicate to other fellow beings	It is difficult for the specially-abled people to communicate	we are visually challenged and deaf people	less confident and unable to communicate as normal people
PS-2	People	Communicate to other fellow beings	It is difficult for normal people to communicate with specially disabled people	We doesn't understand India Sign Language	uncomfortable and unable to communicate to deaf and visually challenged people
